Cast Iron Soil Pipe and Fittings Recycled Content

Tyler Pipe and Coupling certifies that its cast iron pipe and fittings are made from more than 95% recycled post-consumer scrap metal. Tyler Pipe manufactures no-hub, hub and spigot pipe, and fittings in Tyler, Texas and that their products are ICC-ES certified as more than 95% post-consumer recycled scrap metal content. Furthermore, Tyler Pipe cast iron soil pipe and fittings are 100% recyclable at the end of their service life.

Tyler Pipe is pleased to have received “Declare” status with the International Living Building Challenge (ILBC). Declare allows manufacturers to ecologically sound products to demonstrate market leadership in the growing movement toward product transparency and secure a competitive advantage ingredient reporting. Tyler Pipe realizes that consumers and product specifiers are looking for transparency, whether to verify a product’s point of origin, in understanding environmental impacts, or because they want to eliminate exposure to toxic ingredients.

Tyler Pipe is environmentally conscious and strives to be a zero-discharge facility where everything is recycled including; water, air, and waste. Because Tyler Pipe products are made by using a high-content of post-consumer recycled material it prevents thousands of tons of scrap iron from being deposited into landfills annually.

If you have any questions please feel free to call us at (800) 527-8478. Thank you for your continued interest in Tyler Pipe and Coupling.
